

## OMLA FALL FORAY, SEPTEMBER 23-24, 2023

We will meet at 9:30 am Saturday, September 23, at the parking area for the Stone House Loop trail in Salt Fork State Park. The parking area is along Park Road 1, the coordinates are 40.13153°N 81.48630°W (40° 07' 53.524"N 81° 29' 10.687"W).

A map showing the Stone House Loop Parking Area. The area is highlighted in light blue with a dotted pattern. A car icon is circled in orange within the parking area. Surrounding roads are marked with blue circular numbers: 28, 13, 29, 10, 27, and 14. The text "Stone House Loop Parking Area" is written in bold black font. "Horse Camp" is labeled near the bottom right. The word "Stone" is partially visible at the bottom left.

In the afternoon, we'll explore Morgans Knob **11**, on Park Road 3.

A detailed map of the White Loop area. The map features several trails marked with green lines and numbered circles (1, 3, 4, 5, 9, 10, 11, 12, 27, 67, 70). Key locations include Stone House, White Loop A, White Loop B, Sugartree Fork Marina, Morgan's Knob, Golf Course Cottage Area, Golf Pro Shop, Horse Camp (circled in orange), Primitive Camp, Blue Loop, Purple Loop, Mair Cam, and Ca Che. Icons for accessibility (wheelchair) and other facilities (tent, picnic table) are scattered throughout the map.

After collecting for the day, we will have a meeting room available to work on our specimens. If you don't have a microscope or reference books to bring, we'll be glad to share. The meeting room is in the Best Western Cambridge hotel, 2307 Southgate Pkwy., Cambridge, OH 43725, (740) 435-0035.

If you are staying overnight and want to reserve a room at the Best Western, mention "Ohio Moss & Lichen" to get the group rate. There are several other hotels close to the Best Western.

For Sunday morning, we have several sites to choose from: the Blue Loop bridle trail (which starts from the Horse Camp) and the Primitive Camp area along Park Road 4. The park naturalist suggested these sites as having good diversity, but we didn't have time to scout them. Another site is the Group Camp area on Parker Road (Park Road 59).

Let me know if you have any questions or would like more information.

See you!
